- Operate hand and portable power tools when necessary;
- Check oil levels in turbines;
- Read and record, pressures, water table readings, and other information;
- Ensure proper ventilation when working in enclosed spaces;
- Required to wear respiratory protective equipment to include Self Contained Breathing Apparatus (SCBA);
- Act in accordance with regulations of the Occupational Safety and Health Administration; and perform related work as required.

QUALIFICATIONS

Any combination of education, training, and experience that would likely provide the knowledge, skills, and abilities to successfully perform in the position is qualifying. A typical combination includes:

Knowledge of:

- Mathematics applicable to Water Treatment;
- Equipment, materials and terminology used in the operation and maintenance of pumps, motors, generators, pressure regulating devices;
- Computer operating systems and SCADA Systems;
- Control of exit flow and pressures through electrical frequency and wave modulation equipment;
- Theory and principles of electrically driven pumps, their output relative to their type and electrical power consumption;
- Methods of water distribution and treatment;
- Methods of chlorination, water purification and testing;
- Water production and pressure maintenance;
- Appropriate safety precautions and procedures.

Ability to:

- Maintain detailed records;
- Exercise judgment in determining necessary water production levels;

- Determine effect of weather on water levels and distribution rates;
- Make adjustments to equipment in response to water demand and supply;
- Operate SCADA Systems;
- Make adjustments to complex water purification equipment;
- Read and write at a level sufficient for job success;
- Prepare written reports;
- Operate a vehicle observing legal and defensive driving, practices in transporting hazardous materials;
- Understand and carry out oral and written instructions;
- Be physically capable of entering permit required confined spaces and wearing Self Contained Breathing Apparatus (SCBA) equipment;
- Operate an atmospheric tester for entry into confined spaces;
- Wear protective respiratory equipment to include SCBA and personal escape respirator;
- Adhere to and comply with safety standards and the proper use of safety equipment;
- Routinely enter subsurface water works structures to operate and maintain water production equipment;
- Routinely climb ladders and stairs;
- Work in a variety of environmental conditions;
- Establish and maintain effective relationships with those contacted in the course of work.
- See in the normal vision range with or without correction;
- Hear in the normal audio range with or without correction;
- Lift up to 75 pounds in normal duties;
- Work under moderate or high stress conditions;
- Maintain a driving record that meets vehicle code standards and is acceptable to the Department and its insurance carrier.
